

LIAM EGGLESTON

Austin, TX | (512) 638-6117 | liameggs@ucla.edu | liameggleston.com | linkedin.com/in/liameggleston
B.S. Physics candidate at UCLA pursuing electrical engineering. Control systems (MPC, RL, PID), precision timing, and embedded C++.

EDUCATION

University of California, Los Angeles <i>B.S. Physics; pursuing transfer to Electrical Engineering</i> St. Stephen's Episcopal School <i>High School Diploma; Cum Laude Society</i>	2026 – 2030 Los Angeles, CA 2022 – 2026 Austin, TX
Supplementary programs: Automotive Engineering, CIEE (Jul. 2026); Summer Academy for Robotics, UT Austin (Jul. 2024); Neeley Data Analytics Academy, TCU (Jul. – Aug. 2024)	

EXPERIENCE

Founding Engineer & Chief Technology Officer <i>TrueAuto</i>	Feb. 2025 – Nov. 2025 Palo Alto, CA
- Sole engineer at an early-stage service helping private sellers bypass dealership markups; built and shipped the full stack — Python backend on Supabase, deployed on Vercel — plus the marketing site and consultation intake pipeline. - Returned \$75,000 in surplus to 15 clients, an average of \$5,000 per client above the dealership offers they would otherwise have accepted. - Designed the workflow behind a 150-point vehicle inspection with 48-hour turnaround from intake to seller-ready listing. - Owned UX for trueauto.com end to end.	
Creator, <i>elseif</i> <i>YouTube</i>	Nov. 2020 – Present Austin, TX
- Write and produce technical explainers on programming language design, systems behavior, and the ways working code goes wrong; 10,000+ subscribers. “Programming war crimes” series has ~4 million views; work featured on ThePrimeTime.	

ENGINEERING PROJECTS

Precision Timing Research <i>Open Compute Project</i>	2025
Micro-grant recipient for timing-service research under Stephen Wolfram, contributing to the Open Compute Project.	
Double Inverted Pendulum Balancer <i>Control Systems</i>	
Built a stabilization rig for a double inverted pendulum, an underactuated system requiring continuous feedback control.	
PID Line-Following Robot <i>Arduino, C++</i>	2024
Derived and tuned a PID controller from first principles for closed-loop line tracking.	
Obsidian <i>Programming Language for Machine Learning</i>	2023
Designed and implemented a language targeting C++-level performance for ML workloads.	
Assistive Mechanical Pen <i>Mechanical Design</i>	2025
Built a mechanical writing aid for teaching blind students to write.	

PUBLICATIONS

Can You Hear Naples? Building and Benchmarking a Neapolitan Speech Corpus. Accepted to COLM (LowResNLP); arXiv. Built and benchmarked a speech corpus for an under-resourced Romance dialect.

Bridging the Gap: Leveraging Cherokee to Improve Language Identification for Endangered Iroquoian Languages. arXiv. Showed that commercial systems fail basic language-ID tasks for endangered Native languages.

TECHNICAL SKILLS

Languages: C++, Python, Rust, Nim, JavaScript, R, SQL, MATLAB
Systems & Control: Embedded C++, Arduino, PID / MPC / reinforcement-learning control, precision timing
Tools & Platforms: Supabase, Vercel, Git, JupyterLab, RStudio
Certification: MATLAB Certified | **Spoken:** English (native), Spanish (native/bilingual), Mandarin (conversational)

HONORS

State Champion, Texas Math League (2026) | National Merit Semifinalist | Cum Laude Society | Book Award, Projects in Science and Technology | High Honor Roll (2025–2026) | Presidential Volunteer Service Award, Bronze (2025)

LEADERSHIP & ACTIVITIES

Member, IEEE, ASME, and 3D4E student chapters, UCLA (2026 – Present).

President & Founder, Programming Club, St. Stephen's Episcopal School (2022 – Present): built and taught the curriculum.

Climate Leaders Fellow, Rustic Pathways × Stanford Deliberative Democracy Lab (2025): led a team building an environmental-policy site.

Clinical Observership, Oculofacial Plastic Surgery, Belize City (Mar. 2025); volunteered with the Lions Club of Belize City.

USA Climbing top-30 national competitor (speed) | **Concert pianist,** school concerto competition runner-up.
