

Liam Eggleston

(512) 638-6117

liameggleston@gmail.com

Website: liameggleston.com

Enthusiastic and driven high school student with a strong passion for computer science and mathematics. With my global mindset, I leverage my technological acumen to tackle critical societal issues covering topics like climate change and efficient computing.

Education

St. Stephen's Episcopal School – Class of 2026

GPA: 4.00 unweighted

AP COURSES COMPLETED (Score): Calculus BC (5), Physics I (4), Computer Science A, Spanish Language & Culture

AP COURSES IN PROGRESS: None

Data Science Activities

Founder and Writer | Climology (liameggleston.com) (August 2024 - Present)

- Authored and published articles on climate change and an action plan for the future
- Outlined technical projects with influence in the Open Compute Project

Neeley Data Analytics Academy | Texas Christian University (August 2024)

- Established a solid foundation in data science, focusing on data scraping, data cleaning, and gleaning meaningful results from data
- Bridged my programming skills with my passion for environmentalism and my newfound data science resources to explore climate data and predict future trends

What is Data Science? | Coursera, IBM (June 2024)

- Identified the importance and applications of data science in today's data-driven world
- Explored the various paths that can lead to a career in data science
- Learned from advice given by seasoned data science professionals to beginner data scientists

Introduction to Data Science Specialization | Coursera, IBM (July 2024)

- Explored the applications of data science to machine learning, its applications and use cases, and various types of tasks performed by data scientists
- Gained hands-on familiarity with common data science tools including JupyterLab, R Studio, GitHub and Watson Studio
- Developed the mindset to work like a data scientist, and follow a methodology to tackle different types of data science problems
- Wrote SQL statements and query Cloud databases using Python from Jupyter notebooks

Foundations of Data Science | Coursera, Google (June 2024)

- Investigate the impact data analysis can have on decision-making
- Explored preservation of data privacy and ethics

Data Science Math Skills | Coursera, Duke (July 2024)

- Strengthened foundational mathematical concepts essential for data science, including linear algebra, calculus, probability, and statistics
- Developed practical problem-solving skills through hands-on exercises and real-world applications of mathematical techniques
- Enhanced ability to manipulate data mathematically and interpret key results for data-driven decision-making

Introduction to Statistics | Coursera, Stanford (June 2024)

- Built a strong foundation in statistical concepts, including probability, inference, regression, and hypothesis testing
- Developed skills to analyze and interpret data using statistical methods and real-world datasets

- Gained hands-on experience with statistical tools to make data-driven conclusions

Independent Academic Enrichment Experiences

UT Programming Program | ICode (2022)

Coding Apps with Java | ID Tech (July 2022)

- Developed skills in Java

Summer Academy for Robotics | University of Texas at Austin (July 2024)

- Explored robotics with Arduino with past experience in C++
- Leveraged calculus knowledge to create a PID controller
- Applied skills in collaborative group projects, enhancing practical understanding and teamwork

Python Coding: Hand Motion Arcade Games | ID Tech (July 2022)

- Developed computer vision skills using Python, specifically in interpreting hand motions for interactive applications

Web Design | Lavner | Washington University (2022)

Independent Engineering Projects Portfolio (<https://speakingwithcode.com/projects/>)

- Independent phone applications
- Currently developing a physical Text-to-Braille converter with optical character recognition capabilities
- Conceived, researched, designed, and built various robotics and engineering projects, including: voice-controlled virtual assistant, RC Drone, Obstacle Avoiding Car, RC Hovercraft, and RC Remote Controller

Community Engagement Activities - [belize, community service \(other medical missions\)](#)

President and Founder | Hack Club (August 2022 - Present)

- Led a school club dedicated to providing comprehensive education on good programming practices.
- Developed a curriculum and presented in-depth educational lessons to club members

Website | Haiti Club (October 2023 - Present)

- Created and managed a website for my school's sister school in Haiti, St. Etienne
- Helped organize school-wide events to raise awareness and gain exposure
- Sold hand-made gifts to help fund St. Etienne

Medical Mission | Cambodia (September 2021 - Present)

- Advocated for City-Wide Policy Changes: Successfully led initiatives that resulted in significant changes to school food waste policies across the city
- Created a comprehensive playbook for food salvation programs, which was adopted by over 10 schools city-wide
- Mentored student leaders to ensure effective implementation and scalability
- Delivered online presentations to over 300 students, raising awareness and understanding of food security issues
- Rescued and donated over 24,000 food items and 10,000 lbs of food to combat food waste and insecurity

Medical Mission | Cambodia (September 2021 - Present)

- Co-founded a 501(c)(3) organization dedicated to combating food insecurity and food waste
- Conceived and built an innovative app that serves as a platform that connects organizations with surplus food to those in need, addressing both food insecurity and food waste
- Designed and built the organization's website, enhancing visibility and outreach
- Collaborated with key partners such as the NYC Department of Education, Grassroots Grocery, and NY Open Pantry to reduce food waste across New York City
- Secured significant donations of over \$20,000 from the Drew Barrymore Show, Conagra, and Hormel Foods

Recognition/Awards

AMC 8 | Second Place, 2022

Second place in a nation-wide math competition

Math | Honorable Mention, 2024

Awarded to the four strongest math students at my school

Presidential Service Award | Bronze, 2025

Distinction for 100+ hours of volunteer work

Micro-Grant Recipient, 2025

Funding for research contributing to the Open Compute Project regarding timing services
